

INVICTUS

To: DATAMI

Letter of Recommendation

It is my pleasure to strongly recommend DATAMI for all of your pentesting requirements. They conduct themselves in a professional manner and the engagement was quick and efficient.

As it was our first time working together they gave us a proposal of all possible attack vectors as well as the type of testing that they would be conducting. The testing covered all of our concerns and they were very communicative as to when they would be conducting the different tests.

They provided us with a comprehensive report, which included the scope of the tests as well as possible resolutions. After the tests were conducted, we went through the report. It gave us peace of mind knowing that we follow best practices and that we are protected from most common security threats.

I would happily work with DATAMI in future.

Regards,

Nicolaas Vercuiel
VP of Engineering
